

TWIN SYSTEM INJECTORS

Twin system injectors come in sizes from 0 - 11. Refer to chart for grease capacity per cycle from each injector.

The injector size is stamped on the hexagon section of the injector

Brass compression fittings are used when connecting poly line to the injector.

Steel compression fittings are used when connecting steel fittings to the injector.

Injector blocks come in a variety of configurations with varying numbers of ports.

Metering unit number	Grease capacity (cm ³) per cycle
0	0.025
1	0.050
2	0.100
3	0.150
4	0.200
5	0.250
6	0.300

Metering unit number	Grease capacity (cm ³) per cycle
7	0.350
8	0.400
8.5	0.700
9	1.000
10	2.000
11	4.000
